41 WASHINGTON ST. COR EDDY
PROVIDENCE, R.I.

Park Lawn Grass Mixture

In our lawn mixture we use only the highest quality, extra clean seed, and free from weed seeds which abound in inferior grades. We use only the choicest low growing grasses, and a lawn produced from our seed will maintain a rich, dark, velvety appearance and a permanent sod.

*1-2 lb., 20c.; 1 lb., 35c.; 2 lbs., 60c.; 100 lbs., \$ 25.00
1 lb. will sow 600 square feet.*

Shady Nook Grass Mixture

A special mixture of grasses adapted to growing under trees and in shaded places where it is quite difficult to produce a satisfactory growth, 1 quart, 30c.; 1-2 peck, \$1.00, 1 peck, \$1.75.

THE PREPARATION AND CARE OF A LAWN

The ground must first be thoroughly prepared by draining, if necessary, and spade or plow to the depth of 6 to 12 inches, according to the nature of the soil, applying a liberal quantity of well decomposed manure, bone meal or pulverized sheep manure, the latter we recommend as being lasting in effect, not liable to burn the grass and free from weeds. Clean the ground thoroughly and rake perfectly smooth and level, as much of the success depends upon this part of the preparation. The seed should be sown on a calm day, that it may be applied evenly and at the rate of sixty-four pounds per acre, or one pound is sufficient for 600 square feet. After the seed is sown the ground should be rolled with a light roller or evenly tamped with the back of a spade. The plat should be mowed every ten days from May until September, using a sharp scythe in preference to a mower until a close turf is formed. Frequent mowing and rolling is necessary to maintain a close even turf. April and September are the best months for sowing lawn seed.

CATALOGUE OF FLOWER, VEGETABLE AND FIELD SEEDS

Bulbs, Fertilizers, Garden Implements, Etc.

WILLIS S. PINO
SEEDSMAN

41 Washington, corner Eddy Street, Providence, R. I.

In presenting my catalogue for the coming season, I wish to thank my many friends for their liberal patronage in the past, and to solicit their favors for the future.

SELECTION OF STOCK. My connection with the seed trade for more than twenty-five years should have eminently fitted me to secure stocks that will prove satisfactory to the most critical trade, as I have been able to demonstrate to those who have trusted me with their seed orders.

LOCATION OF STORE. My store will be found on the northwest corner of Washington and Eddy streets, one block from Dorrance or Westminster streets, and within a short distance of the Union Railroad Station.

SEEDS BY MAIL. For the benefit of out-of-town buyers, I pay postage on all seeds ordered in packets, ounces and one-fourth pounds. Add for prepayment of postage on large quantities at the rate of eight cents per pound. Peas and Beans fifteen cents per quart. Corn ten cents per quart.

EARLY ORDERS are always advisable, as the stock of many varieties is liable to be exhausted early and many times good stocks are not obtainable later.

PACKING AND DELIVERY. I make no charge for boxes and packing and deliver all goods free within the city limits. Seamless bags are charged fifteen cents and small cloth bags ten cents each.

While the greatest care is exercised to have all seeds pure and reliable, I do not give any warranty, expressed or implied. If the purchaser does not accept the seeds on these terms and conditions, they must be returned at once, and the money that has been paid for same will be refunded.

Willis S. Pino

VEGETABLE SEEDS

All Vegetable Seeds except Peas, Beans, Corn and those otherwise mentioned are put up in 5c. packages.

We Send Free by Mail all vegetable seeds in packages. ounces and one-fourth pounds; larger quantities, add postage at 8c. per pound. Peas and Beans, 15c. per quart. Corn, 10c. per quart.

Artichoke

Sow seeds in hot bed early in spring in rows six inches apart, transplant into boxes or pots. Plant in open ground after danger of frost is passed two by three feet between plants. Rich, sandy loam is best adapted. Seed may be sown in open ground in May and protected until cold weather is past and will head the second year.

Large Globe or Paris, pkt. 10c.; oz. 35c.

Asparagus

One ounce to 40 feet of drill.

Sow the seed in spring in drills 15 inches apart; the following spring transplant to permanent beds. Plant for private use in rows 6 inches apart and allow 12 inches in the rows, covering the roots 6 inches. For market on a large scale set 4 by 2 feet.

Oz. $\frac{1}{4}$ lb. lb.

Conover's Colossal	10	20	50
Pametto	10	25	75
Barr's Mammoth	10	25	75

Beans, Dwarf or Bush

One quart to 100 feet of drill.

For succession bush beans should be planted at intervals of two weeks from May until August. Make drills two feet apart and two inches deep.

Oz. $\frac{1}{2}$ pk.

Stringless Green Pod Extra early, stringless, round pod. Very prolific and excellent quality 25 75

Extra Early Red Valentine

An excellent round, green podded sort 25 75

Early Bountiful Practically a stringless Yellow. Six weeks 25 75

Dwarf Horticultural An excellent shell bean. 25 75

Goddard, or Boston Favorite Larger than the preceding variety. A popular market variety 25 75

Low's Champion Recommendable as a string or shell bean. 25 75

Improved Golden Wax

A favorite yellow podded variety; pods flat. 30 1 00

Pencil Pod Black Wax Pods round, bright yellow and entirely stringless. The best dwarf black wax variety 30 1 00

Round Pod Kidney Wax Pods long, entirely stringless. Very prolific. Excellent quality. 30 1 00

Wardwell's Kidney Wax A popular variety with wide flat pods 30 1 00

Dreer's Bush Lima. A dwarf form of the Dreer's or Potato Lima 35 1 25

Henderson's Bush Lima Earlier than the Burpee, but a smaller bean 35 1 25

Burpee's Bush Lima The best variety of Bush Lima. Beans equal in size to the large white pole Lima 35 1 25

Beans, Pole or Running

One quart to 150 hills.

The planting of pole beans should be delayed a week or more after the planting of the early dwarf sorts. Make hills about 3 feet apart and 1 to 2 inches deep, and plant 5 or 6 seeds in each hill; thin to 3 plants in each hill when well established. Lima should not be planted until weather becomes warm and settled. Flat beans should be placed in the soil edgewise, eye down. Qt. $\frac{1}{2}$ pk.

Horticultural Pole. A very prolific shell bean 30 1 00

Hampden Longer podded than above, dark color, fine cropper 35 1 25

Kentucky Wonder An excellent variety, entirely stringless, round pod 30 1 00

Golden Cluster Wax A yellow podded variety of fine quality 40 1 50

Scarlet Runner Highly ornamental; also used as a table bean 35 1 25

White Runner Similar to above except color of flowers 35 1 25

Large White Lima (Extra Size) The standard pole Lima. Quality excellent 35 1 25

Dreer's Improved Lima A short, thick bean, often called Potato Lima 35 1 25

Sevia, or Small Lima An excellent bean, earlier and more hardy than large Limas 30 1 00

English Broad Windsor The standard English bean 35 1 25

Beet

One ounce to 50 feet of drill; 5 to 6 pounds per acre.

Sow early as ground can be worked in the spring, and for succession follow every two weeks until July. For main crop sow last of May. Light sandy loam well enriched with stable manure is best adapted and should be plowed and harrowed until very fine. Make drills one foot apart, and when well up thin to four or five inches in the row.

Extra Early Egyptian A very early Oz. $\frac{1}{4}$ lb. lb. flat blood red sort. Popular for first planting and forcing 10 20 60

	Pkt.	Oz.	1/4 lb.	lb.
Crosby's Egyptian An improved strain of Egyptian Beet. Rich dark red, crisp and tender. An excellent early sort.....	10	25	75	
Eclipse Globe shaped, extremely early and excellent quality	10	20	60	
Detroit Dark Red Very tender and sweet; skin dark blood red; flesh bright red; fine round shape. Excellent for main crop.....	10	25	75	
Edmand's Blood Turnip Highly recommendable for main crop; uniform in size, very dark flesh and excellent quality	10	20	60	
Dewing's Blood Turnip A standard main crop variety of excellent shape and color.....	10	20	60	
Long Smooth Blood Deep, blood red, excellent quality	10	20	60	
Swiss Chard (Spinach Beet) Produces leaves only; which are used as greens. The quality is far superior if given a high cultivation.....	10	20	60	

Sugar Beets and Mangel Wurzel

Sow in May or June; 5 to 8 pounds per acre.

	Pkt.	Oz.	1/4 lb.	lb.
Norbitan's Giant A long red variety adapted to deep soil	15	35		
Mammoth Long Red A standard sort.....	15	35		
Yellow Globe Adapted to shallow soil.	15	35		
Golden Tankard A yellow variety, formed mostly above ground; easily pulled	15	35		
Vilmorin's White Sugar The best sugar beet for stock feeding	15	35		

Broccoli

One ounce will produce about 3000 plants.

Closely resembles Cauliflower, but more hardy and sure heading. Sow seed in May and plant out in June in rows two feet apart each way.

	Pkt.	Oz.	1/4 lb.	lb.
White Cape Heads creamy white and of large size	10	30		

Brussels Sprouts

One ounce will produce about 3000 plants.

The seed should be sown about the middle of May in a seed bed, and the plants afterwards set in rows two feet or more apart and cultivated like Cabbage. This vegetable does not require extremely high cultivation. It is ready for use late in autumn, after the early frosts.

	Pkt.	Oz.	1/4 lb.	lb.
Dwarf Improved Compact in growth and of excellent quality	25	65		

Borecole or Kale

One ounce will produce about 3000 plants.

Sow in beds early in spring and transplant in June; treating in same manner as Cabbage.

	Pkt.	Oz.	1/4 lb.	lb.
Dwarf Green Curled Scotch Very dwarf and spreading, the best variety.....	10	25	75	
Siberian (Dwarf German Greens or Sprouts). Usually sown in September, to use the following spring	10	25	75	

Cauliflower

One ounce will produce about 1000 plants.

Cultivate as directed for cabbage. In dry weather water liberally. Cauliflower likes a cool moist situation.

	Pkt.	Oz.	1/4 lb.	lb.
Early Dwarf Erfurt Very earliest dwarf variety, for family use or market gardeners.....	20	20	20	
Early Snowball A very popular early variety; for family use or market gardeners.....	20	20	20	
Early Paris Medium size and sure heading variety	10	25	75	

Cabbage

One ounce will produce about 1500 plants.

For early use sow the seed in hot beds in February or March, or may be sown about the middle of September, and the plants wintered over in cold frames. Transplant in spring, as soon as the ground can be worked in rows 2 feet apart, and the plants 18 inches apart in the rows. For late or winter use, the seed should be sown in May and the plants set out in July 2½ by 3 feet.

OUR CABBAGE SEEDS ARE ALL THE BEST AMERICAN GROWN.

	Pkt.	Oz.	1/4 lb.	lb.
Early Winnigstadt Pointed head, very hardy and sure to head	20	50	150	
Early Jersey Wakefield The best early sort medium size, pyramidal shape, with rounded peak,	25	75	250	
Charleston, or Large Wakefield Much larger than the above, but not as early....	30	90	300	
All Head, Early The largest heading second early sort. Heads flat and very solid.	25	75	250	
All Seasons A superior variety for second early and late; early as Early Summer and larger,	25	75	250	
Henderson's Early Summer The leading early drumhead variety	25	75	250	
Hollander, or Danish Ball Head Excellent winter sorts, heads very solid.....	25	75	250	
Warren Stone Mason An improved Stone Mason, earlier, deeper and more solid.....	25	75	250	
Large Late American Drumhead An excellent late sort, sure heading and splendid quality,	20	50	150	
Premium Flat Dutch The standard main crop variety	20	50	150	
American Drumhead Savoy Improved The finest Savoy variety, finely curled, large and solid,	25	60	200	
Early Ulm Savoy The earliest and sweetest savoy	25	60	200	
Mammoth Rock Red Large size, very solid,	25	75	250	

Chervil

	Pkt.	Oz.	1/4 lb.	lb.
Curled Chervil An aromatic sweet herb. The young leaves are used in soups and salads. Sow thinly in May in drills half an inch deep, one foot apart	10	30		

Carrot

One ounce to 100 feet of drill; four pounds per acre.

For early crop sow as soon as the ground can be worked; they may be sown as late as the middle of June. The drills should be one inch deep and one foot apart, thinning out to three or four inches between the plants. Carrots do best in a deeply tilled, sandy loam.

Oz. 1/4 lb. lb.

Early Scarlet Horn A favorite sort; for early summer use.....10 25 80

Early French Forcing The earliest variety grown; small, tender. Fine quality

10 25 80

Danvers Half Long Rich deep orange color; excellent quality: roots taper to a point. A very heavy cropper (select stock)

10 30 90

Oz. 1/4 lb. lb.

Guernarde, or Ox Heart Stump-rooted; one of the most valuable varieties, either for family use or market; fine flavor and color; very productive,

10 25 80

St. Valery An excellent variety for private gardens. Grows from ten to twelve inches long,

10 25 80

Improved Long Orange Large variety; used for main crop

10 25 75

Chantenay A stump rooted variety having a large shoulder; very productive

10 25 80

White Belgian Large white root; extensively grown for stock feeding

10 20 50

Celery

One ounce will produce about 1500 plants.

Seeds may be sown in the open ground in April. Sow about half an inch deep and firmly press the soil over the seed. After the seed is up, keep care-

fully clear of weeds until the time of planting, in June or July. After the ground has been well prepared, plant in rows from three to four feet apart, according to the variety, setting the plants about six inches apart and pressing the soil firmly about the roots. The soil best suited for celery is a rich, moist loam.

Oz. 1/4 lb. lb.

White Plume Excellent for early use; naturally white, requires little blanching.....25 75 2 50

Golden Self-blanching. True stock. Similar to above except that the stalks are a beautiful golden yellow. Our stock of this celery is endorsed by the leading market gardeners of this section. Package, 10 cents

40 1 50 5 00

Winter Queen Robust growth, medium height. An excellent keeper and desirable for winter storage. Package, 10 cents

30 75

Pink Plume A pink variety of the self-blanching type

25 75 2 50

Giant Pascal An excellent late sort, easily blanched and a good keeper.....20 60 2 00

Boston Market A dwarf branching variety, 20 60 2 00

Celeriac, or Turnip Rooted Grown exclusively for the roots

25 75 2 50

Soup Celery For flavoring

05 10 30

Corn, Sweet

One quart to 200 hills; one peck per acre.

Plant in hills three feet apart each way, and five to six kernels in a hill. Hoe often and draw soil up to the stem. Make ground rich with well rotted manure. For succession planting should be made at intervals from May to July.

CHOICE CONNECTICUT GROWN

Price, all varieties, qt., 20c.; 2 qts., 35c., 4 qts., 65c.; 1 peck, \$1.25. Except where noted.

Peep o' Day Very early, small ears, very sweet. Qt., 25c.; 2 qts., 45c.

Early Cory Early, good sized ears and large grains.

White Cory Like the above; white cob and kernel.

Golden Bantam Extremely hardy, allowing earlier planting than other varieties. Superior rich flavor. Pt., 20c.; qt., 35c.; 2 qts., 60c.

Crosby's Early Matures after Cory; excellent quality.

Potter's Excelsior, or Squantum Very sweet and tender, one of the finest for main crop.

Stowell's Evergreen One of the most popular varieties for main crop.

Black Mexican Very sweet and superior quality.
Bearfoot A very desirable late variety, qt., 25c.;
 $\frac{1}{2}$ pk., 80c.
Late Mammoth Large ears, rich and sweet.
Country Gentleman The sweetest and most tender of all varieties. Qt., 25c.; $\frac{1}{2}$ pk., 80c.

Field and Fodder Corn

	Pk.	bu.
Early Yellow Canada	Very early; eight rowed	
	60	2 00
Longfellow	Ears average 12 to 15 inches in length	60 2 00
Sanford	Ears large and small cob, white kernel,	60 2 00
Red Cob Ensilage	Sweet, tender and juicy producing abundance of foliage	50 1 75
Improved Leaming	Ears large and handsome, deep grain, small cob	50 1 75
Evergreen Sweet Fodder	For cutting green for stock	50 1 75
Pop Corn	Rice and White Pearl, choice Eastern grown, lb., 10c.	

Corn Salad or Fetticus

Used as a salad. Is sown in early spring, in rows a foot apart, and is fit for use in six or eight weeks from the time of sowing.

	Oz. $\frac{1}{4}$ lb.	lb.
Large Leaved	10 25 75

Cress or Pepper Grass

A well-known pungent salad; cover very slightly, sow at frequent intervals to keep up a succession; to be used before the flowers appear.

Extra Curled Very fine; may be cut two or three times 10 20 50

Upland Hardy perennial; adapted to any soil, wet or dry. A very rapid grower and ready for use very early in spring; pkt., 10c.; oz., 75c.

Water Cress Hardy perennial aquatic plant, 40 1 25 4 00

Cucumber

One ounce to 50 hills; 2 lbs. per acre.

Cucumbers succeed best in warm, rich, sandy loam. Plant when all danger of frost is past, in hills about four feet apart each way; the hills should be previously prepared by mixing thoroughly with the soil of each a shovelful of well rotted manure; sow for pickling from the middle of June to the middle of July. Price, except where noted, oz., 10c.; $\frac{1}{4}$ lb., 35c.; lb., \$1.25.

Improved White Spine One of the best varieties for table use.

White Spine Forcing A special strain for cultivation under glass. Fruit grows very even in size; color, dark green..... 30 1 00 4 00

Early Russian The earliest in cultivation; small and productive.

Early Cluster Length about 5 inches; tender and productive.

Boston Pickling True stock; the best variety for pickling.

Oz. $\frac{1}{4}$ lb. lb.

Green Prolific Excellent for summer use and for pickling.

Improved Long Green Ten to twelve inches in length; dark green.

West India Gherkin Small, oval shaped, for pickling 25

Everbearing Small sized, very early, and enormously productive.

Japanese Climber Can be grown either as an ordinary ridge cucumber or as a climber, 15 50

English Frame Telegraph For growing in hot beds. Pkt., 25c.

Dandelion

One ounce will sow 100 feet of drill; two pounds to one acre.

Sow in May or June in drills a foot apart, press the earth firmly over the seed, cultivate during summer, cover lightly with straw during winter, and the following spring the leaves will be fit to cut. The roots when dried and roasted are often employed as a substitute for coffee.

Improved Broad Leaved Pkt., 10c.; oz., 40c.; $\frac{1}{4}$ lb., \$1.50; lb., \$5.00.

Egg Plant

One ounce will produce about 1000 plants.

The seed should be sown in hot beds the first week in April. Plant out about June first, about two and a half feet apart. The Egg Plant will thrive well in any good garden soil.

Black Beauty Fully ten days earlier than Imp. New York, remarkably healthy growth and large fruit; pkt., 10c.; oz., 50c.

Improved New York Spineless Quite free from spines, fruit of large size, and perfect form; two weeks earlier than the old variety. Pkt., 10c.; oz., 50c.

Endive

One ounce will sow 150 feet of drill.

Sow in drills one foot apart, thin out to ten inches apart, blanch when the leaves are about nine inches long, by drawing them together and tying them carefully.

Green Curled Very hardy, leaves dark green, tender 15 40 1 50

French Moss Curled Very finely curled variety, 15 40 1 50

Batavian Broad-leaved. Leaves long and broad, chiefly used in soups 15 40 1 50

Kohl Rabi

The seeds of this plant may be sown at the same period as the Swedish or Rutabaga Turnip, and may be cultivated in the same way, remembering to leave the chief part of the stems uncovered by the earth. The bulbs may be kept sound and nutritious until late in the spring, even later than those of Turnips.

Early White Vienna The best variety, 20 60 2 00

Early Purple Vienna Later than the white, 20 60 2 00

Leek

One ounce will sow 100 feet of drill.

The Leek is very hardy and easily cultivated. Sow in April in drills one foot apart, and transplant in July into rows fifteen inches apart, and six inches from each other in the rows. The soil should be rich but not fresh manured.

Large American Flag The kind mostly grown for Market 20 50 1 50

Musselburgh Grows to very large size, 20 50 1 50

Lettuce

One ounce will sow 100 square feet or 120 feet of drill.

The earliest sowing may be made in February or March under glass, with slight heat. For later supplies, sow in the open ground, as the season will permit, thin out well and set in rows two feet apart, and a foot between the plants. Lettuce requires good ground and abundant moisture.

Oz. $\frac{1}{4}$ lb. lb.

Boston Forcing	A small compact, very early heading sort	20	60
May King	Extremely early. For out of door or glass culture	20	60
Boston Market	Fine for cold frames or open ground	15	40 1 25
Black-Seeded Tennisball	Heads close and hard,	15	40 1 25
Improved Salamander	Heads compact and resist the summer heat well	20	50 1 50
Hanson	Large heads, solid; an excellent summer variety	15	40 1 25
Big Boston	Fine for cold frames or out doors; Heads large and solid	20	50 1 50
Curled Silesia	A favorite for the home garden,	15	40 1 25
Early Curled Simpson	Very popular for out-door culture	15	40 1 25
Boston Curled	Fine frilled leaves; crisp and tender	15	40 1 25
Black-Seeded Simpson	Excellent for forcing or out-door culture	20	50 1 50
All the Year Round	A popular summer sort,	20	50 1 50
White Summer Cabbage	Excellent for out-door,	20	50 1 50
Crisp as Ice	Medium size, solid head; one of the best bronze leaved sorts	20	50 1 50
Tomhannock	Upright growth; crisp and tender; brown edged	15	40 1 25
Self-folding Cos	Should be sown early and tied up to blanch	20	50 1 50

Mustard

One ounce to 80 feet of drill.

Sow in shallow drills a foot apart. The young leaves are used for salads and the seeds for flavoring.

White	Best for Salads	05	10 20
Brown	More pungent in flavor than the white,	05	10 20

Melon—Musk

One ounce to 80 hills; 2 to 3 pounds per acre.

Prepare hills four to five feet apart each way; mix well with the soil in each hill a couple of shovelfuls of thoroughly rotted manure. When the weather has become warm plant from 12 to 15 seeds in each hill; afterwards thin out, leaving four good plants.

Oz. $\frac{1}{4}$ lb. lb.

Emerald Gem	Early, small; flesh deep orange; very sweet	20	60 2 00
Extra Early Hackensack	Earlier than Hackensack and not quite as large,	10	30 1 00
Early Christina	Very choice; flesh yellow; early; one of the best	10	30 1 00

Golden Netted Gem One of the earliest, best and most prolific small melons.....10 30 1 00

Jenny Lind Flesh light green; small but very early.....10 30 1 00

Nutmeg Fruit oval, very early; exceedingly sweet.....10 30 1 00

Miller's Cream Skin very thin, dark green; flesh salmon and excellent flavor.....10 30 1 00

White Japan Very early and prolific, medium size; flesh green; thick and very sweet,.....10 30 1 00

Melon—Water

One ounce to 30 hills; 4 to 5 pounds per acre.

Plant in hills as directed for Musk Melons, and treat in all respects the same except that the hills should be about 8 feet apart. Price, all varieties, oz., 10c.; $\frac{1}{4}$ lb., 20c.; lb., 60c.

Cole's Early Medium size; flesh bright red; excellent quality.

Phinney's Early Very early and sweet; flesh deep red.

Kleckley's Sweet Vines vigorous and productive; flesh bright red and exceedingly sweet.

Hungarian Honey Very early, nearly round, dark green skin, brilliant red flesh.

Mountain Sweet One of the best; color dark green.

Black Spanish Large; very dark green; flesh deep red; sugary.

Citron For preserves only.

White Gem Perfectly round, almost white skin, bright red flesh.

Mushrooms

"American Pure Culture Spawn," produced under the new *selective* method, recently discovered, the only method which makes possible the segregation of varieties, is received *absolutely fresh* at frequent intervals from the manufacturer. This spawn will produce mushrooms of a specific variety selected with special reference to their size, color and prolificness, to the exclusion of other and inferior fungi. It absolutely eliminates all danger of raising poisonous mushrooms. We keep on hand the cream white variety. Bricks weigh from $1\frac{1}{4}$ to $1\frac{1}{3}$ lbs., and will spawn 10 square feet of beds; each, 20c.

Illustrated book, *Mushroom Culture and Pure Culture Spawn*, containing the latest methods of raising, preserving and cooking mushrooms, 25c. per copy, postpaid.

Nasturtium

The seeds while young and succulent are pickled and used as capers. Sow the seeds in drills one inch deep, the tall grown by the side of a fence, or supported by a trellis.

	Oz. $\frac{1}{4}$ lb.	lb.
Tall Mixed	10	30
Dwarf Mixed	10	30

\$1 00
1 00

Okra or Gumbo

One ounce to 75 hills.

Sow early in May, in drills two inches deep, setting the plants from two to three feet apart.

Dwarf Green The very best variety for general cultivation 10 30 1 00

Onions

One ounce will sow 100 feet of drill; 6 lbs. per acre.

A rather strong, deep, rich, loamy soil is considered most suitable for onion culture. Prepare ground the previous autumn by plowing or spading deeply and applying a heavy coat of well-rotted barn-yard manure. Sow seed early in spring in shallow drills one foot apart, covering with fine soil, and press down by the use of a light roller or the back of a spade. Thin plants to 4 inches and keep free from weeds.

Our Onion Seed is all Eastern grown.

Yellow Globe Danvers True Buxton type. A standard sort, deep globe shape, large size, mild flavor and a good keeper..... 20 50 1 75

Large Red Weatherfield One of the most productive and longest keeping sort. Large size, flat purplish red color 20 60 2 00

Southport Yellow Globe Larger than Globe Danvers, excellent quality 20 60 2 00

Southport Red Globe Very early, globe shape, bright red color, excellent keeper... 20 60 2 00

Southport White Globe Large, globe shape, mild flavor and firm; a good keeper. Always command a high price in market..... 25 85 3 00

White Portugal Excellent for family use, and recommendable for pickling..... 30 1 00 3 00

Prizetaker Globe shape, very large size, extremely mild flavored; is most satisfactory when sown early in hot bed and transplanted. 20 60 2 00

The Queen Rapid growth, mild flavored and a good keeper 20 60 2 00

Onion Sets

(Prices variable.)

Parsley

One ounce will sow 150 feet of drill. Sow thickly in drills a foot apart and half an inch deep early in the spring, having soaked the seed in tepid water a few hours.

Oz. $\frac{1}{4}$ lb. lb.
Champion Moss Curled Fine and unsurpassed for garnishing 10 25 75

Oz. $\frac{1}{4}$ lb. lb.
Fern Leaved Very ornamental; valuable for table decorations.

10 30 90
Plain Leaved Excellent flavor.

10 20 60
Hamburg Rooted Fleshy vegetable root for soups, etc.

10 25 75

Parsnips

One ounce will sow 200 feet of drill 5 lbs. per acre.

Sow as early as possible, half an inch deep, and press the soil firmly over the seed; succeeds best in a rich, sandy loam.

Hollow-Crown, or Long-Smooth The standard sort for general use 10 20 50

Peas

One quart will plant about 100 feet of drill. One and one-half bushels per acre.

Plant the extra early smooth varieties soon as the ground can be worked; and the wrinkled sorts soon as the ground becomes warm. Make rows for dwarf varieties two and one-half feet apart and for tall sorts three feet apart.

Ot. $\frac{1}{2}$ pk.

Gradus A variety rivaling the first earlies in earliness, but producing pods and peas equal to the large marrow sorts. Unexcelled in quality and flavor 35 \$1 25

Thomas Laxton Resembles the Gradus in size of pod but of darker color and considered a better cropper 35 1 25

New York Market Very early and productive. A general favorite among the market gardeners; robust in growth and withstands drought well; height, $2\frac{1}{2}$ feet 25 65

Improved Daniel O'Rourke A standard extra early sort; height, $2\frac{1}{2}$ feet 25 65

Alaska or Earliest of All The earliest pea in cultivation; matures nearly its entire crop at one picking; height, $2\frac{1}{2}$ feet 25 65

American Wonder One of the earliest wrinkled peas, dwarf and robust in growth, pods long and well filled; height, 10 to 12 inches 30 1 00

Qt. $\frac{1}{2}$ pk.

Nott's Excelsior An excellent dwarf wrinkled pea robust and vigorous in growth. Peas and pods large; quality and productiveness unexcelled,

30 1 00

New Dwarf Champion A sort with all the merits of the Champion of England, height, 26 inches, matures little after Little Gem.....25 75

McLean's Advancer A standard variety of excellent quality25 75

Telephone A very popular variety, height, $3\frac{1}{2}$ feet. Pods 5 to 7 inches long, containing 8 to 12 peas of unequalled flavor.....30 1 00

Stratagem Improved Pods large size and well filled; quality excellent; height, 2 feet..30 1 00

Everbearing A branching and everbearing sort. Height, 3 feet; pods long, well filled....25 75

Champion of England A standard tall growing sort; productive and good quality.....25 75

Black-Eyed Marrowfat Hardy and productive; an old standard, height, 4 feet.....20 50

Dwarf Sugar Edible, pods can be used like a string bean

30

Pepper

One ounce will produce about 2000 plants.

Sow the seed in March or April in a hot bed, and transplant to the open ground as soon as the weather is quite warm, in rows about 20 inches apart and 15 inches apart in the rows. A warm sandy loam is best. Prices except where noted, oz., 25c.; $\frac{1}{4}$ lb., 75c.; lb., \$2.50.

Giant Crimson The earliest very large sweet pepper. Plant vigorous, upright, larger than Chinese Giant and more productive. Pkt., 10c.; oz., 50c.; $\frac{1}{4}$ lb., \$1.50.

Sweet Mountain Large size, regular, handsome shape, mild flavor, very early,

Large Bell A standard sort, large size, mild flavor

Squash Medium size, productive.

Ruby King Very mild, fruits 4 to 6 inches long; excellent for stuffing; a very popular sort.

Long Red Cayenne Bright red, slender pods, very pungent.

Red Cherry For pickling; cherry shaped.

Chilli Very small, red, very pungent.

Potatoes

All the leading varieties, choice Maine grown stock, at lowest market prices.

Pumpkin

Pumpkins are now principally cultivated for agricultural purposes. They are usually planted in fields of corn or potatoes, but may be profitably raised in fields by themselves. Sow first of May, in hills eight feet apart.

Oz. $\frac{1}{4}$ lb. lb.

Yellow Sugar Very sweet; an excellent table sort

10 20 60

Connecticut Field For feeding stock.05 15 40

Large Cheese Flat, one of the best varieties for family use.....10 20 60

Radish

One ounce will sow 100 feet of drill.

Radishes require a light, rich, sandy soil. For an early supply sow in a hot bed in February, care being taken to give plenty of ventilation. For a successive supply, sow from the middle of March until September, at intervals of two or three weeks.

We carry but one grade; the best.

Oz. $\frac{1}{4}$ lb. lb.

Early Scarlet Globe For forcing in greenhouses, hot beds and cold frames or open-ground sowing, this is one of the very best. Globe shaped, fine scarlet color, crisp, mild and tender. Small tops. The market gardeners' favorite....10 25 75
Price of the following varieties....10 20 60

Early Scarlet Turnip A standard variety for market or family use.

French Breakfast Olive shaped, bright scarlet, white tipped. A favorite sort.

Long Scarlet Short Top Long, smooth crisp and tender.

Scarlet Turnip White Tipped Very early, excellent quality.

Wood's Early Frame Long, red, crisp. good for forcing or out door.

White Giant Stuttgart Top shape, white skin and flesh, summer variety, but does not become pithy until late and can be stored for winter.

Olive Shaped Scarlet Firm, crisp, good flavor.

White Strasburg A favorite summer variety.

White Turnip A favorite summer variety.

Long Black Spanish An excellent winter sort.

Round Black Spanish A winter variety.

Rose China Winter Scarlet, white tipped, excellent quality.

Spinach

One ounce to 100 feet of drill.

For summer use, sow early in March, in drills fifteen inches apart, and for succession at intervals of a fortnight. For winter use sow late in August. The soil should be heavily manured and deeply trenched.

Giant Thick Leaved The best for spring or fall sowing05 10 30

Victoria Leaves large, thick, dark green. A favorite for spring or fall sowing....05 10 30

Long Standing Excellent for spring sowing, 05 10 30

Prickly The hardest sort, generally used for fall sowing05 10 30

Bloomsdale Savoy leaved, for sowing in the fall for early spring use.....05 10 30

New Zealand Entirely distinct variety, produces a large quantity of leaves; for summer use, 10 30 90

Salsify or Oyster Plant

One ounce to 50 feet of drill.

The Salsify has a long white, tapering root, resembling a small parsnip; when properly cooked it has the flavor of an oyster, and is a good substitute. Sow early in drills 15 inches apart; cover the seeds an inch and a half deep.

Oz. $\frac{1}{4}$ lb. lb.

Long White The standard sort	10	30	100
Sandwich Island Grows to a large size; very mild flavor	15	50	150

Squash

Bush sorts, one oz. to 50 hills; 6 lbs. per acre.

Running sorts, one oz. to 16 hills; 4 lbs. per acre.

The Squash is a very tender vegetable, sensitive of cold and cannot in our climate be planted before the middle of May. Plant in rich soil, in hills prepared similar to those for Cucumbers. All sorts thinned to not over three plants to a hill.

Giant Summer Crookneck Larger than the ordinary summer crookneck10 25 75

White Bush Scallop Early; a good market sort, 10 25 80

Yellow Bush Scallop Yellow flat, scalloped edge 10 25 75

American Turban A favorite late variety, 10 25 80

Boston Marrow A good keeping winter sort, 10 25 80

Golden Bronze Dark grayish green skin; bright yellow flesh; fine grained.....10 25 80

Hubbard The standard winter squash, 10 25 80

Chicago Warted Hubbard A popular selection of the well-known Hubbard, having dark green warted shell. Large size and excellent quality, 10 25 80

Golden Hubbard Similar to the standard sort except in color10 25 80

Delicious Medium size, thick, bright yellow flesh; excellent flavor10 30 100

Essex Hybrid A fine fall variety...10 25 80

Mammoth Chilli Enormous size. orange yellow color15 35 125

Winter Crookneck A favorite winter sort, 10 25 80

Tomato

One ounce will produce about 2000 plants.

The seed should be sown in a hot bed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high set out in boxes, three inches deep, four inches apart, in another hot bed or pot singly. If transplanted a second time will be stocky and branching. When the weather has become mild, transplant into warm, light, rich soil four feet apart.

Price except where noted, oz., 25c.; $\frac{1}{4}$ lb., 75c.;
lb., \$2.50.

June Pink Extra early purple fruited, very desirable.

Earliana The earliest large red tomato. A favorite among market gardeners.

Chalk's Early Jewel Medium early, bright scarlet, ripening up to the stem without cracks or green core.

Acme Very early, smooth, color purplish pink.

Matchless The best; large fruited, bright red tomato.

Beauty Large, smooth, early, dark purplish pink.

Favorite Large, smooth, productive. A good shipper.

Trophy A standard late variety.

Perfection Early, regular and productive, reddish scarlet.

Livingston's Globe Large purple fruit, excellent quality; pkt., 10c.; oz., 40c.

Dwarf Champion A distinct variety; robust, short jointed; fruit early, medium size, crimson color.

Stone A remarkable main crop variety. Smooth, solid and very little seed capacity, very productive and quality is unequalled.

Dwarf Stone The largest fruited of the dwarf sort. Color, bright scarlet.

Ponderosa The largest variety in cultivation. Oz., 40c.; $\frac{1}{4}$ lb., \$1.25.

Golden Queen A large, smooth yellow variety. **Strawberry (Husk).** A favorite preserving sort.

Tobacco

One ounce will produce plants for one acre.

Sow broadcast in hot beds or in open ground soon as ground can be worked. Keep free from weeds and water freely in dry weather. Set out about June 1st three feet apart on highly manured ground.

Pkt. oz.

Connecticut Seed Leaf 10 30
Havana 10 40

Turnip

Ounce will sow 150 feet of drill; one pound per acre in drills; 2 to 3 pounds broadcast.

For summer use, sow early in the spring in drills and thin out to eight inches. For fall and winter, sow from July to September. Rutabagas should be sown in June or early in July, in drills eighteen inches apart; thin out when large enough, six to nine inches apart in drill, according to size.

Oz. $\frac{1}{4}$ lb. lb.

Extra Early Purple Top Milan The earliest Turnip. White, flat, medium size..... 10 25 75

Red Top Strap Leaf A popular quick growing sort 10 20 40

White Egg Rapid growth, pure white, egg shaped, fine grained 10 20 50

Golden Ball Medium size and excellent quality, 10 20 50

Cow Horn Flesh white, fine grained a good table sort 10 20 50

Budlong White Rock Much smoother than the old type, white flesh, mild and sweet. 10 20 60

Twentieth Century Rock Fully three weeks earlier than the Budlong. Excellent quality, and a remarkable keeper. 10 25 75

Sweet German Flesh white, sweet and mild flavored 10 20 60

Improved American Yellow flesh, excellent quality 10 20 60

Grass Seeds**Prices May Change as the Season Advances**

Rhode Island Bent One of the best grasses for lawns in adapting itself to almost any soil, dry, moist or sandy. Valuable for permanent pastures. Per lb., 35c.

Kentucky Blue (*Poa Pratensis*). A superior grass for pastures and lawns. Succeeds well in all soils and stands dry weather well. Per lb., 25c.

Orchard Grass (*Dactylis Glomerata*). One of the earliest grasses and very hardy. Should be sown with Red Clover, as it blossoms about the same time. It is very productive and makes excellent hay. Grows well in shady woodlands, but do not use it for lawns. Per lb., 30c.

Timothy (*Phleum Pratense*). A variety well known and highly appreciated. Produces large hay crops if grown on moist clayey soil. Market price.

Red Top (*Agrostis Vulgaris*). A hardy perennial grass, succeeding best on moist land. Used extensively in all pasture mixtures, remaining green the greater part of the year. Recleaned, per lb., 25c.

Sweet Vernal (*Anthoxanthum Odoratum*). A perennial grass used in pasture mixtures. Per lb., 50c.

Tall Meadow Oat Grass (*Avena Etiator*). An early grass much relished by cattle, and produces an abundant supply of foliage. It is hardy and valuable for pasture. Per lb., 30c.

Hard Fescue (*Festuca Duriuscula*). One of the best dwarf grasses; excellent for dry soil. Hardy and withstands long periods of drought. Per lb., 25c.

Meadow Fescue (*Festuca Pratensis*). A valuable grass for permanent pastures. Very productive and nutritious. Per lb., 20c.

Crested Dog's Tail (*Cynosurus Cristatus*). An excellent grass for hilly situations and shady parts of lawns, thriving best on rich, moist land. Per lb., 45c.

Rough Stalked Meadow Grass (*Poa Trivialis*). Produces an abundant crop of highly nutritious herbage. Grows well on rich, moist lands and sheltered situations. Per lb., 35c.

Sheep's Fescue (*Festuca Orina*). An excellent grass for sheep pasture. Perfectly hardy, dwarf, compact growth. Per lb., 20c.

Fine Leaved Fescue (*Festuca Ovina Tennifolia*). Adapted to dry soils. Per lb., 40c.

Red Fescue (*Festuca Rubra*). Suitable for sandy soils and at the seashore. Per lb., 30c.

Meadow Foxtail (*Alopecurus Pratensis*). One of the earliest and best pasture grasses; grows rapidly when cut or eaten down by stock. Should only be sown with other grasses. Per lb., 35c.

Creeping Bent (*Agrostis Stolonifera*). One of the best lawn grasses; succeeds well in deep soils. Per lb., 35c.

Wood Meadow Grass (*Poa Memorialis*). Chiefly used for shaded positions in lawns and woodland parks, where other grasses will not grow. Per lb., 55c.

English Rye Grass (*Lolium Perenne*). A very nutritious, rapid growing grass. Valuable for meadows and pastures. Per lb., 12c.

Clovers

Alfalfa (*Lucerne*). Requires a deep, rich soil, and in such will produce several crops every season; one of the best green fodder plants; 10 to 15 lbs. to the acre. Per lb., 20c.

Alsike Clover (*Trifolium Hybridum*). Resembles in growth, duration, etc., the Red Clover; thrives well in cold, wet and stiff soils; 10 lbs. to the acre. Per lb., 25c.

Medium Red Clover (*Trifolium Pratense*). Is a perennial, but of very few years' duration; is considered the most nutritious of all species and most valuable in moist locations. Market prices.

White Clover (*Trifolium Repens*). Valuable for lawns and pastures. Per lb., 30c.

Crimson Clover (*Trifolium Incarnatum*). Sown at the last of summer or early autumn; it furnishes a very early green fodder; excellent for soiling; 20 lbs. to the acre. Per lb., 15c.

Millets

German, or Golden Millet Medium early; height 3 to 5 feet; heads closely condensed; spikes very numerous; seeds round, golden yellow, in rough bristly sheaths. Per bushel (50 lbs.), \$1.75.

Hungarian Millet (*Panicum Germanicum*). One of the most valuable annual soiling plants. It will grow in any ordinary soil, withstands drought well, and in this latitude may be sown as late as the first day of July, and produces a large green crop; 1½ bushels to the acre. Per bushel (48 lbs.), \$1.75.

Japanese A new millet. very productive if sown early and cut; usually produces a good second crop. Has produced six tons dry hay per acre. Sow one bushel to the acre. Per lb., 10c.; per 100 lbs., \$9.00.

FLOWER SEEDS

Our stock of flower seeds has been selected to supply the wants of a critical florists' trade and our customers may be sure of receiving nothing but seeds of the finest quality.

All flower seeds in packages, ounces and one fourth pound mailed free at prices; larger quantities, add eight cents per pound.

<i>Double Mixed</i>	10

STOCKS

Sweet Peas

Fragrant climbing annuals. Seeds should be sown early in spring to enable the vines to get a good strong growth before the warm weather. Make trenches six inches deep, in which the seed should be sown, covering them two inches. As soon as the plants show through, fill in the trench, which will secure a deep root and allow blooming through the heat of summer. Keep the flowers picked off as fast as they come into full bloom, for if the pods are allowed to form, the plants will stop blooming.

Sweet Pea Collection One package each; fifteen distinct named varieties, 50c. One ounce each fifteen varieties, \$1.00.

SWEET PEAS

Oz. $\frac{1}{4}$ lb. 1b.

Wild Flower Garden Mixture

These mixed flower seeds embrace more than a hundred varieties of such easy growing and pretty flowers as are suitable for forming a wild flower garden. They are very useful for woodland walks, roadsides, alongside of fences and on untidy bare spots and which if properly cared for and kept free from weeds, can be made to produce a continual display of bloom during the summer. Pkt. 10 cents.

SUMMER FLOWERING BULBS

CALADIUM—Esculentum This is one of the most beautiful and striking of the ornamental foliage plants, for growing in pots or for planting on the lawn, or masses in beds. It is of the easiest culture, and will grow in any good garden soil.

Dry Bulbs 10c. each; 75c. per doz.; medium, 15c. each, \$1.25 per doz.; large, 20c. each; \$2.00 per doz.

Caladium—Fancy Leaved Decorative foliage plants for pots. Baskets, tropical bedding, etc. 15c. each; \$1.50 doz.

Calla Spotted leaved. Desirable for outdoor planting. Requires a moist situation. 10c. each; \$1.00 doz.

Crinum Kirkii Enormous lily like flowers, fragrant, white with dark red stripes. 35c. each.

Tuberous Rooted Begonias Begonias are indispensable for shady places in the garden or lawn also desirable for pots or piazza boxes. Start in the house in March or April and remove to the open soon as danger of frost is past. They will bloom freely from July until cut down by the frost. Dry tubers may also be planted in the open ground in May. Care should be taken to keep constantly moist.

Single White, yellow, rose, scarlet, crimson, orange. Price extra fine bulbs, 10c. each; 75c. doz.

Double White, yellow, rose, scarlet, crimson, orange. Price extra fine bulbs, 10c. each; \$1.00 doz.

bulbs should be started in a warm place—greenhouse, hot bed, or sunny window. Early in the fall they should be dried off, letting the leaves die; the pots can be kept over winter in a cellar free from frost. Price, extra strong bulbs, named varieties, 10c. each; doz., \$1.00.

Hyacinthus Candicans (Summer Hyacinth). Excellent for clumps or among shrubbery. 5c. each; 35c. doz.

Madeira Vine A rapid growing vine with fragrant white flowers. 5c. each; 40c. doz.

GLADIOLUS Bulbs planted in open ground in spring produce plants with long rush-like foliage and magnificent flower spike early the following autumn.

Groff's Hybrids A strain of recent introduction and without doubt the most popular strain in cultivation. Awarded certificates of merit by all the leading horticultural societies.

GROFF'S SILVER TROPHY STRAIN Comprising the best of Groff's New Hybrid Seedlings divided in three color selections. Doz. 100

Pino's Special Mixture Composed of only fine varieties, comprising an excellent variety of colorings and all strictly first size bulbs. Doz., 25c.; per 200, \$1.75.

LILIMUM AURATUM (The Golden-Rayed Lily of Japan). The flowers are pure white, thickly studded with crimson spots, while through the centre of each petal runs a clear golden band. Flowers measure nearly a foot across. First size bulbs, 20c. each; \$2.00 per dozen.

Elegans, or Thunbergianum Early flowering, ranging in height from 14 inches to 4 feet; flowers cup-shaped, borne upright, and of a great variety of colors. Mixed bulbs, each, 15c.; doz., \$1.25.

Tigrinum Splendens (Improved Tiger Lily). Reddish salmon with dark spots. Each, 10c.; doz., \$1.00.

Tigrinum Flore Pleno (Double Tiger Lily). Each, 10c.; doz., \$1.00.

SPECIOSUM VARIETIES They are hardy, needing very little protection, and will grow and flower without special treatment.

Album This is a pure white and very fragrant variety, with beautifully recurved petals. A very fine sort. Each, 25c.; doz., \$2.50.

Rubrum White ground, with bands and spots of rose or crimson on each petal. One of the best lilies. We have a splendid stock of this very hardy and beautiful kind. Each, 20c.; doz., \$2.00.

TUBEROSES In this latitude May 1st is ample time to plant in the open ground, but the bulbs can be started in pots much earlier if desired. Select a warm soil and a sunny spot. The soil should be rich, but no especial preparation is necessary. Place the bulb so the top will be covered about one inch with soil.

Excelsior Pearl Extra fine large flowering bulbs. 5c. each; 35c. per dozen.; \$1.75 per 100. Add 10c. per doz. if sent by mail.

GLOXINIAS Should be grown in pots in the house or on the veranda, in boxes or little frames outside, and will flower all summer. Their green leaves are surmounted with a cluster of lovely trumpet shaped flowers. The coloring is exquisite; the groundwork of many is pure white, with throats of blue, scarlet, rose or crimson; or the tubes are of bright colors with white throat. The

OXALIS These summer flowering bulbs should be planted out early in May, about two inches deep. Mixed colors, 20c. doz.

MONTBRETIAS Hardy, summer flowering, bulbous plants, with brightly colored flowers, borne in long spikes. Varieties, 50c. doz.

CANNAS 10c. each; 75c. per dozen.

Madam Crozy Crimson scarlet, bordered yellow.
Florence Vaughan Golden yellow, spotted crimson.

Alphonse Bouvier Finest tall crimson.

Alsace Sulphur yellow, turning to pure white.

J. D. Eisele Brilliant vermillion scarlet overlaid with orange.

Chas. Henderson Crimson

Paul Marquant Salmon

Virginia Pink

Shenandoah Best dark leaved.

Ismene Grandiflora Treated same as Gladiolus, will flower in 6 to 8 weeks after planting. Very beautiful lily like plant. Extra large bulbs, 20c. each; \$2.00 doz.

Dahlias

SHOW AND FANCY

Bride White tipped with lavender. Fine.

Myrtle	15c. each; \$1.50 doz.

Clematis

A most beautiful class of hardy, free-flowering climbers. Plants of our importation, strong and finely rooted.

Paniculata This lovely white variety, with its thousands of fleecy, small, star-like flowers, is one of the finest climbing plants known. It bears so profusely and in such dense but airy clusters that the whole plant appears as one mass of bloom, with dark shining foliage enough only to give effect to its beauty. It is deliciously fragrant, is a very rapid climber, flowers freely the first year, and is perfectly hardy. Flowering plants, each, 25c.; doz., \$2.50. Extra large plants, each, 50c.; doz., \$5.00.

Jackmanni One of the best; fine, rich purple, 75c. Miss Bateman Pure white; creamy band down each petal, 75c.

FERTILIZERS

Sheep Manure Pulverized This is a pure natural manure, and the most nutritious food for plants. It is excellent as a top dressing for lawns. There is nothing better for mixing with the soil for greenhouse plants; one part manure and six parts soil. For use in the vegetable garden, placed directly in hills or drills, it promotes a rapid and steady growth. It makes the richest, safest and quickest liquid manure. One pound to five gallons of water; 2 lb. package, 15c.; 5 lbs., 25c.; 10 lbs., 40c.; 50 lbs., \$1.25; 100 lbs., \$2.00.

Unleashed Hardwood Ashes As a fertilizer for lawns, gardens and fruits, Hardwood Ashes are unequalled; they are not a mere stimulant, but supply natural plant food, permanently enriching the soil. Clean, free from offensive odor, and can be applied by any one. They are exceedingly valuable for lawns, imparting a rich, dark shade of green and destroying many of the insects which are so injurious. Price, 100 lbs., \$1.25.

Mitchell's Special High Grade Fertilizer Contains all the necessary elements of plant food, in the most obtainable form to meet the wants of all plants in all periods of their growth. Guaranteed to contain ammonia, 4½ per cent.; phosphoric acid, 9 to 11 per cent.; actual potash, 6 to 7 per cent. Per 100 lbs., \$2.25; 50 lbs., \$1.35.

Land Plaster Used for preventing bugs from destroying cucumber, melon and squash vines. Price, package, 25c.; per bag, 90c.

Bowker's Food for Flowers A dressing made expressly for plants grown in the house, garden or conservatory. Clean, odorless, and producing early and abundant blossoms, and healthy, luxuriant plants. Small packages, enough for thirty plants for three months, 15c. each. Large package, 25c.

Bowker's Lawn and Garden Dressing Prepared from chemicals free from weed seed, clean, to handle and easily applied. Per 100 lbs., \$3.00; 25 lbs., \$1.00; 10 lbs., 50c.; pkg., 10c.

Bonora A complete plant food, immediately soluble and applied directly to the root of all plants, giving a healthy, lasting growth. 1 lb. package, 50c.

Pure Ground Bone Meal This finely pulverized ground bone is excellent for rose culture, top dressing for lawns and for potted plants; 5 lb. package, 20c.; 10 lbs., 35c.; 50 lbs., \$1.00; 100 lbs., \$1.75.

Nitrate of Soda This is valuable solely for the nitrogen it contains, equal to 20 per cent. of ammonia. Being extremely soluble, it should not be applied until the plants are above ground, when 100 to 500 pounds per acre, mixed with wood ashes or land plaster, for convenience in applying, are generally used. 5 lbs., 30c.; 10 lbs., 50c.; 100 lbs., \$3.50.

**INSECTICIDES**

Ant Destroyer A non-poisonous powder which sprinkled around their haunts will drive black ants from lawn, etc. Pkg., 50c.

Arsenate of Lead A poison rapidly taking the place of Paris Green. Adheres well to the foliage and will not burn the tender leaves. Lb., 20c.; 5 lbs., 95c.; 10 lbs., \$1.80.

Aphis Punk A special preparation of nicotine, for the extermination of green and black fly, thrip, etc. Not injurious to delicate plants. Per package, 12 rolls, 60c.

Bordeaux Mixture For all fungoid diseases, such as mildew and various rots of grapes, etc. Prepare by adding one gallon of mixture to 49 gallons of water. 1 gal. can, \$1.00; 1 qt., 40c.

Bug Death A non-poisonous powder that takes the place of Paris Green and other dangerous insect powders. When used as directed it is sure death to potato, squash and cucumber bugs, currant and tomato worms, etc. It is applied dry and will not blow or wash off. 1 lb., 15c.; 3 lbs., 35c.; 5 lbs., 50c.; 12½ lbs., \$1.00.

INSECTICIDES—Continued

California Wash (Lime, Sulphur and Salt) This preparation is scientifically prepared and is widely recommended and known as one of the best preparations for San Jose's scale, oyster shell scale, etc. Apply fall and spring while leaves are off. One application is not sufficient, as many of the scales get under the rough bark and are difficult to reach. Ready for use by adding 16 to 20 gallons water to each gallon of mixture. 1 gallon, \$1.00.

Climax Lawn Sand when applied to weedy lawns, will adhere to the rough, hairy leaves of Dandelions, Plantains, etc., and, by absorbing therefrom all the sap, destroy them beyond recovery. 3½ lb. can, 60c.; 7 lb. can, \$1.00.

Death to Lice (Lambert's) An effective remedy for all kinds of poultry vermin. Package, 25 and 50 cents.

Fir Tree Oil One of the most reliable for red spider, green fly, mealy bug, caterpillars, slugs, blight, etc. Dilute with water and apply with ordinary syringe or bellows, or by dipping the plants. Per pt., 75c.; qt., \$1.15; gal., \$4.00.

Grape Dust A preparation to kill the destructive mildew that strikes the grape vine; also for like use upon any other plants or trees affected with mold, mildew, or rust mites, either in greenhouses or the open air. 5 lb. packet, 30c.

Hellebore Powdered White Hellebore for rose slugs, currant worms, etc. Dust on with gun or bellows while the foliage is moist. ½ lb., 15c.; 1 lb., 25c.

Kerosene Emulsion For aphids on all plants. Ready for use by simply adding water. Quart, 40c.; gallon cans, \$1.00.

Nikoteen Is the cheapest, cleanest and most effective of insecticides, and will not injure or discolor delicate plants. It is composed of that element in tobacco which gives it its value as an insecticide and nothing else. Bottle, \$1.50.

Paris Green Superior quality. Lb., 35c.

Persian Insect Powder Effective against almost all kinds of insects. ½ lb., 25c.; 1 lb., 40c.

Scalecide The latest and best spray for San Jose scale. A mechanical preparation of petroleum oil that instantly mixes with cold water. One gallon of Scalecide to 20 gallons of water sprayed on your trees and bushes will kill every scale that it reaches without injury to tree or fruit bud if applied in late fall, winter or early spring while the foliage is off. Price, qt., 40c.; 1 gallon can, \$1.00; 10 gallon can, \$6.00; 50 gallon barrel, \$25.00.

Slug Shot Destroys all insects injurious to house and garden plants, vegetables and fruits of all kinds. Equals Paris Green when used liberally, without the danger from poison. Price, 5 lb. package, 25c.

Sulphur, Flowers of A staple preventive for mildew on grapes, roses, etc. Lb., 10c.; 10 lbs., 50c.

Tobacco Soap Makes an excellent wash for plants and trees infested with green fly, lice and eggs of insects. Dissolve 2 oz. in gallon of water. Pkt., 20c.

Tobacco Dust If dusted on while the foliage is moist it destroys rose lice, cabbage and turnip fleas, etc. Spread upon the ground, it keeps off earth insects, and acts as a fertilizer. Per lb., 10c.; 2 lbs., 15c.; 5 lbs., 30c.; 100 lbs., \$3.50.

Tobacco Stems for Fumigating Price on application.

Whale Oil Soap Makes an excellent wash for trees and plants; kills insects and eggs on the bark. Per lb., 15c.

POULTRY

CONKEY'S ROUP CURE

A guaranteed remedy for all forms of roup. Directions in each package. Price per package, 50c.

PORCELAIN NEST EGGS Price, 3c. each; doz., 25c.

WYANDOTTE FOOD FOR YOUNG CHICKS

A safe and nourishing food for chicks just out of the shell, and one that can be depended upon to carry them right along until fully matured. This food is given dry, though plenty of pure water should always be on hand for the little fellows to drink. Wet or even moist foods are highly objectionable and altogether unnatural to all gallinaceous birds and they should never be employed except in the process of fattening for the market. 5 lbs., 25c.; 10 lbs., 40c.; 25 lbs., 75c.; 50 lbs., \$1.50; 100 lbs., \$2.50.

PRATT'S POULTRY FOOD

A cure and preventive of chicken-cholera, roup, gapes and other diseases. Molting fowls when fed Pratt's Poultry Food will lay sooner and will increase the quantity of eggs. Price, 26 oz. package, 25c.; 5 lb. package, 60c.; 12 lb. bag, \$1.25.

SHERIDAN'S CONDITION POWDER

Prevents and cures diseases of hens. It is strictly a medicine to be given in small doses once daily in their food. Price per package, 25c.; large pkg., 80c.

DEATH TO LICE OINTMENT

Used for head lice on chickens. 1 oz. pkg., 10c.

CHARCOAL (Granulated) Aids digestion and corrects many of the poultry ills; pkg., 15c.; 10 lbs., 40c.

SUPPLIES

MICA CRYSTAL GRIT

For Chickens, Geese, Turkeys, Pigeons and Birds. It makes thorough digestion of food possible. Two grades for Chicks and Poultry. Price per package, 10c.; 100 lb. bag, 65c.

GROUND OYSTER SHELLS

Furnishes one of the best sources for Shell-making material. Thoroughly washed and dried. Price per package, 10c.; 100 lb. bag, 65c.

ROUP PILLS

For roup, swell head, and canker in fowls. Directions on each box. Price per box of 50 pills, 25c.

EGG TESTERS

Made of Tin; will fit any small lamp. Each, 35c.

POULTRY MARKERS Made in two sizes. Each, 25c.

DRINKING FOUNTAINS

Sanitary, square, galvanized, in two parts, easily cleaned and filled. Price, 1 gallon, 50c.; 2 gallon, 85c.

SANITARY EARTHENWARE

In two parts, large drinking surface. Price, 2 pts., 25c.; 3 pts., 30c.; 4 pts., 35c. each.

SANITARY FEED BOX

Made of galvanized iron, with three spaces, 50c.

LEG BANDS Aluminum. Per doz., 15c.

INSECT POWDER BELLOW

Each, \$1.00 and \$2.00.

INSECT POWDER GUN

Useful in dusting hens with powder. Each, 10c. and 20c.

GARDEN TOOLS AND REQUISITES

Bellows Woodason's Powder. For Hellebore, Tobacco Dust, etc. Each, \$1.00 and \$2.00.

Bellows Sulphur. Used only for Sulphur, \$1.50.

Baskets Verbena. Adjustable Wooden handles with tin fastenings on the ends. Small size, 10 x 5, 3 inches deep, \$2.00 per 100.

Dibbles Used in transplanting cabbages, etc. Steel points, 35c. each.

Forks Digging or spading, 75c. each. Hay or stable, 35c. to 75c. each. Manure, long or short handles, 50c. to \$1.00.

Hoes Draw, with handles, 40c. and 45c. each. Hoes, Scuffle or Dutch, 40c. to 65c. each. Plympton, 60c. Warren, 60c.

Hose Rubber. Excellent quality, in 25 and 50 foot lengths; $\frac{1}{2}$ in., 13c. per foot; $\frac{3}{4}$ in., 14c. per foot.

Hose Extra quality, recommended for greenhouse use; $\frac{1}{2}$ inch, 17c. per foot; $\frac{3}{4}$ inch, 18c. per foot.

Fumigators Eureka. For smoking greenhouses with dampened tobacco stems. No. 2 holds one peck of stems, \$2.00. No. 3 holds $\frac{1}{2}$ bushel stems, \$2.50. No. 4 holds $\frac{3}{4}$ bushel of stems, \$3.25.

Garden Lines Hemp, braided, 100 feet, 50c.

Reels For above, 50c. each.

Glazier Points. Van Reypers The only durable and reliable points. Made of steel wire and galvanized. Per box of 1000, 60c.

FUMIGATORS

Pincers For same, 40c.

Grafting Wax $\frac{1}{4}$ lb. package, 10c.; $\frac{1}{2}$ lb., 15c.; 1 lb., 25c.

Grass Hooks (Sickles) English, each 50c. and 60c.

Tennent Atomizer With mixer. The newest and best spraying device on the market, for greenhouse use, trees, shrubbery, vines, henhouses, etc.

The spraying tubes are so arranged that it will spray overhead, which no other hand sprayer will do. 85c. each.

Hose Couplings Set, 20c.

Hot Bed Mats Palmer's. Wool filled, frost proof. Made expressly for winter covering of hot beds, cold frames, plants, etc. Price, burlap covering, 76 in. x 76 in., \$1.25 each; waterproof duck, one side, \$2.00.

Knives Budding and Pruning, 60c. to \$1.00. " Asparagus. For cutting asparagus under the surface, 45c. each.

Edging Knife Handled, 60c.

Lawn Rakes Wooden, best quality, 50c. each.

Hose Nozzle Boston Rose spray. Copper face, flat. One of the best nozzles for the greenhouse, flower garden or lawn, 50c. each.

Hose Nozzle Bordeaux. The simplest and best spraying nozzle made for $\frac{1}{2}$ inch hose, 75c. each.

Hose Menders Cooper's Made of heavy brass. Requires no wire or pliers to adjust them. For $\frac{1}{2}$ inch or $\frac{3}{4}$ inch hose, dozen, 75c. 1 inch, 85c. doz.

Lawn Sprinklers Peck's Improved. Standard, 4 feet high, arms revolve, scattering a fine spray evenly over a space 50 feet in diameter, 4 arm sprinkler, \$3.00; 8 arm sprinkler, \$3.50.

Lawn Sprinkler Water Witch, No. 3, 75c. each; No. 4, \$1.20 each.

Tremlow's Old English Glazing Putty For bedding glass in sash or for filling cracks or seams in roof joints or frames of greenhouses or hot beds. When once set on dry wood it does not heave. Gallon, \$1.25.

Mastica Glazing Machine Each, \$1.25.

Pruners Water's Tree. This pruner never fails to cut the slightest twig. It is the cheapest and most practical pruner on the market. 6 ft., 75c.; 8 ft., 85c.; 10 ft., \$1.00; 12 ft., \$1.10.

Pruners Telegraph, without handles. \$1.25 each.

Pumps Perfect Success Bucket Spray. The best and most durable portable hand pump. It has large air chamber, double acting, throwing continuous stream either solid or in fine spray, \$4.35

Pump Simplex Barrel Sprayer. A large air chamber insures a constant stream; mechanical agitator keeps liquid stirred. Brass working parts. Price, pump only, with Y connection, \$7.80.

Rollers The benefit derived from the use of a roller on the lawn, especially in the spring, is not fully understood. The action of freezing and thawing causes the ground to heave, and if the sod is not firmly pressed back with a roller before the hot weather begins, the grass is apt to be killed or injured, leaving the lawn full of bare spots. The Rollers we offer are made of first-class material, outer edges being beveled to prevent cutting sod, and face of roller is turned perfectly smooth.

Bouquet Holders Iron, for cemetery use, 30c. ea.

" " Glass, for cemetery use, 35c. ea

The Links Lawn Boot

For Use on Golf Links, Tennis Courts and Fine Lawns

Aside from the lasting qualities it is the only humane boot, for the reason that it is firmly fastened to the hoof instead of around the ankle, thus giving free action to the horse's feet and obviating all possibility of chafing. Price, set of four, \$8.00.

Townsend's Horse Lawn Mower

Triple rolls with triple pawls in each roll, making the most powerful and instantaneous driving mechanism ever put in a lawn mower.

This feature maintains the motion of the blades even in turning sharp corners, and forms a strong contrast with other double roll Mowers whose knives have no motion when turning corners. It is made very strong and powerful, of the very best materials, and finished in the most perfect manner.

It will cut over very rough and uneven ground and stand very rough usage, and still will get down into the turf and cut its swath clean, easily and smoothly. It is, on this account, very popular with golf clubs. We warrant it superior to any mower ever built, and will refund the purchase price to any customer dissatisfied after a trial.

Furnished with seat, handles and shaft complete, and made 30-inch or 38-inch width of cut. Price, \$60 to \$80.

FOLDING PLANT STANDS

Can be opened or folded in a few seconds. Finished in green and bronze. Compact and durable. Takes up very little space when not in use. 3 Wire Trays, 7½ x 30, \$3.00.

WIRE WINDOW SHELF

with steel brackets. Can be applied to any window moulding. 30 inch shelf, 75c. 36 inch shelf, \$1.00. 42 inch, \$1.25.

OVAL PLANT STAND

20 x 30, \$3.00.

No B, 10x15, 40c. " " No. D, 16x25, \$1.25 " "

“Lion” Ball Bearing Lawn Mower

The ball bearing in lawn mowers is the latest and probably the greatest improvement in their manufacture. The “Lion” is constructed with 10-inch skeleton rim driving wheels, $6\frac{1}{4}$ -inch cutting cylinder with five knives. Is a strong and powerful easy running mower.

For those who mow their lawns frequently we advise the use of fine blade machines, as they leave the lawn in a very smooth condition.

16-inch, \$10. 18-inch, \$11. 20-inch, \$12.

Universal

A Superior Quality Low Priced Machine

This mower is built to accommodate those who have but little grass to cut and wish a low priced machine, yet one that will do good work. While this machine should not be compared with strictly high grade mowers yet we consider it an excellent machine for moderate use. 14-inch, \$3.50; 16-inch, \$3.75.

Roller Lawn and Golf Mowers

On lawns where exceptionally fine cutting is a necessity, there are no mowers to equal these. They cut smoothly, effectually doing away with that wavy appearance so often seen on a freshly cut lawn. They will also roll down a new lawn and protect it against upheavals caused by dampness, ants and other insects. These are the only mowers that will cut borders properly and without danger of cutting the sod.

Price, 18-inch, 6 blades, \$15.

“Iron Age” Combined Seed Drill and Double Wheel Hoe

The Seed Drill is complete in itself, merely requiring to be bolted with two bolts to the wheel frame. As a drill it opens the furrow, drops the seed, covers and rolls it and marks the next row at one passage. It can be set to sow shallow or deep, thick or thin, as desired, and handles all garden seeds. The flow of seed can be instantly shut off to turn rows. The agitator is a revolving brush which will not injure seed in the slightest.

Combined Drill Seeder and Double Wheel Hoe, \$11. Combined Hill and Drill Seeder and Double Wheel Hoe, \$12.

The “Iron Age” Hill and Drill Seeder

This is the most complete tool ever offered by the manufacturers of the “Iron Age” implements. It has only been placed upon the market after a most thorough experiment and field tests. The wheel is 16 inches high, made of steel, with a 2-inch tread. The opening plow is clog proof and can be instantly adjusted. The hopper is low; therefore the delivery of the seed is close to the ground, thus making possible accurate spacing.

The distance of spacing the seed can be instantly changed by simply removing a small wheel at the side of the hopper and reversing it, or by putting on another.

The flow of seed can be instantly stopped or started by a convenient finger latch on the handle.

Price, \$11.00.

"IRON AGE" DOUBLE WHEEL HOE

For the cultivation of garden crops it is an indispensable implement. With it one person does the work of several men with great ease. One great advantage which this double wheel hoe possesses is that it can be made into a practical single wheel hoe in a moment's time. The wheels are 16 inches high, enabling the wheel hoe to run easy and without yielding to the depression of the soil, as a low wheel will do. The frame being made of tubing coupled to *malleable* castings gives great strength, together with lightness. Price, complete, \$7.00.

THE "GEM OF THE GARDEN" WHEEL HOE Single Wheel Hoe

No greater proof can be given of the popularity of a tool, or of its intrinsic worth, than the one simple fact of a continued demand for it. In the past few years there have been placed about *fifteen thousand* of the "Gem" Wheel Hoes in the hands of gardeners, and we are not aware of a single instance in which it has failed to give entire satisfaction to the user. It is not a toy, neither is it a tool made of light gray castings, calling for constant repair, the "Gem" being largely made up of *steel* and *malleable iron*. The set of slender stirring teeth, each stamped from one piece of steel, cannot be excelled for thorough work, especially in hard soil. Price, complete, \$5.00. With teeth only, \$3.75.

"IRON AGE" SINGLE WHEEL HOE With Cultivator Teeth, Plow and Rakes

This tool is, in regard to the work done, almost a counterpart of the Double Wheel Hoe, and the same remarks as to its construction, extreme lightness and ease of operation will apply with equal force. For the small kitchen garden we consider the single wheel hoe as being preferable. The work is done principally between the rows, although plants of small growth can be hoed on both sides at once by placing the wheel on the left side. With this single wheel tool spaces of exceedingly narrow width can be worked even using but one cultivator tooth. With the large plow attachment deep furrows can be opened or closed, potatoes, celery and other crops hilled—in short all work usually accomplished by a special plow. Price, complete, \$6.00

FARMOGERM

(*High Bred Nitrogen-Gathering Bacteria*)

"**Makes Poor Soil Good Soil**"

It is well known that nitrogen is the most expensive of fertilizing elements. It is also known that it is the plant food in which most soils are deficient. We are pleased, therefore, to be able to offer our patrons an improved and most reliable method of inoculating soil with nitrogen-gathering bacteria. By moistening the seed of any leguminous crop to be planted with Farmogerm, not only is the immediate crop benefited by this pure culture of high bred nitrogen-gathering bacteria, but the soil is enriched in nitrogen which will be available for future crops of any kind for two or three seasons. One of the important advantages which Farmogerm has over other and earlier preparations of this kind is the fact that it needs no treatment or development before using. It comes in sealed bottles ready for use with a little water according to directions.

Soil inoculation is a big subject and the possibilities of it are only partly appreciated by many. We have no space for details here but we hope our customers will write us for a free pamphlet on the subject which we will be pleased to send. Investigate before planting any of the following crops:—

Alfalfa, Alsike, Berseem, Crimson Clover, Red Clover, White Clover, Canadian Field Peas, Cow Peas, Soy Beans, Velvet Beans, Vetch, Lupins, Peanuts, Garden Beans, Garden Peas, Sweet Peas and other legumes.

When ordering be sure and state for what crop Farmogerm is wanted.

We are prepared to supply Farmogerm for any one or all of these crops at the laboratory price of \$2.00 per acre, 10% discount on 25 acres, 15% discount on 50 acres, 20% discount on 100 acre orders.

Garden size, mixed culture, good for Peas, Beans and Sweet Peas, at 50 cents a bottle. Also White Clover for lawns.

The U. S. Department of Agriculture says: "*The pure culture method has come to stay.*"

GROFF'S HYBRID GLADIOLUS

One of the most popular and reliable Gladiolus strains in the market. It is a hybrid between two old-time favorites, "Old Gold" and "White Star". The flowers are large, double, and very fragrant. They are produced in great abundance and are excellent for cutting. The plants are hardy and easy to grow. They are particularly well suited for the cut-flower trade.

For Larger Crops and Richer Soil at Lowest Cost—Fertilize with **FARMOGERM** High-Bred Nitrogen Gathering Bacteria

Before soil can produce a big crop it must contain plenty of nitrogen or nitrates. Nitrogen is the plant food which is most often lacking in the soil. It is also the most expensive fertilizing material to supply in the ordinary way. Commercial fertilizers which are rich in nitrates are very high in price and the expense and labor of transporting and spreading them must be added to the cost.

But it is now no longer necessary for you to carry that burden of expense and trouble. When planting alfalfa or any of the clovers, or when planting any kind of peas or beans, whether field or garden, you may simply inoculate the soil with nitrogen gathering bacteria by moistening the seed with Farmogerm. In this way you will supply your soil with enough nitrates to produce several bumper crops at the low cost of \$2.00 an acre and with practically no extra work.

THIS IS A PROVED SCIENTIFIC AND PRACTICAL FACT. Soil inoculation with nitrogen gathering bacteria has long been recognized as the final solution of the nitrates problem. The only trouble heretofore has been to perfect a simple, sure and economical method of getting the right bacteria into the soil. And now this problem is solved. Any one can use Farmogerm. It is all ready to use. No development or treatment necessary by the user, as has been the case with other methods. Besides, Farmogerm contains carefully selected nitrogen gathering bacteria which have been bred up to a state of strong vitality and great nitrogen gathering power. And the bacteria keep alive and vigorous in Farmogerm so that they are in perfect condition to do the most good when used.

Further on we give a list of the crops with which Farmogerm may be used. It is only in the variety of crops known as the legumes that the nitrogen gathering bacteria get in their work. When Farmogerm is used on the seed of such crops, or sprayed over the field or mixed with earth and spread, the bacteria multiply rapidly, by the millions, and enter the roots of the young plants, where they generally form nodules or little nobs, which you may have noticed on the roots of clover plants, or pea and bean vines. They begin at once to draw nitrogen from the unlimited supply in the air, and as they convert it into soluble nitrates it is immediately available for the growing plants. This insures a more rapid and heavier growth of the crop and adds greatly to its food value, owing to the fact that it contains a larger proportion of nitrogen.

BUT THIS EARLIER MATURITY, LARGER YIELD AND GREATER FOOD VALUE OF THE FIRST CROP IS ONLY PART OF THE GOOD WORK THAT FARMOGERM DOES. The next two or three crops also get the benefit. The bacteria store nitrogen in the soil, leaving for future crops, on the average, as much available nitrogen to the acre as 700 to 1,000 pounds of nitrate of soda would add. This much nitrate of soda would cost from \$20.00 to \$30.00, while enough Farmogerm for an acre costs \$2.00. Be-

A sample of what Farmogerm has done. This cut shows relative growth of inoculated and uninoculated Alfalfa. Same number of plants in each bunch. The bunch from the inoculated plant weighs over three times as much as the other.

sides, when using Farmogerm you get a big extra profit on the crop you use it with, and the nitrogen which the bacteria gathers stays in the soil better and is in more available form for the plants than that which is added with nitrate of soda.

REMEMBER, ANY CROP REAPS THE BENEFIT OF THE NITRATES ESTABLISHED IN THE SOIL BY GROWING AN INOCULATED LEGUME CROP. In other words, you may plant your legume crop, inoculated with Farmogerm, take off a big crop, and then the soil is ready to produce a bumper crop of anything you wish to sow it to, such as corn, wheat, oats or any grain as well as cotton, tobacco, potatoes or other vegetables.

Send for our pamphlet which gives full particulars and contains reports from many users of Farmogerm, as well as the opinions of high authorities regarding this first reliable, simple and economical method of drawing nitrogen from the free and unlimited supply in the air.

Farmogerm is Not Over-Estimated.

We do not claim that Farmogerm will cure all the ills of soil or failure of crops.

It does add nitrates to the soil—all the crops can use and more, but it does not add potash and phosphates. Furthermore, Farmogerm will not overcome results due to bad seed, insufficient seed, improper preparation and cultivation, and decidedly adverse weather conditions. It cannot be used successfully on sour soil. Sweeten sour soil by liming before using Farmogerm.

We make no extravagant claims for Farmogerm. We make no claims which are not borne out by the facts—facts which we can prove.

It is the lack of nitrates in his soil which presents the greatest problem to the average farmer, and it is this problem which Farmogerm will solve for him at the small expense of \$2.00 an acre and practically no extra work or trouble.

Why Farmogerm Produces Results.

The U. S. Dept. of Agriculture has been working to develop nitrogen-gathering bacteria, and the following are quotations from their reports:

"It has been amply demonstrated, not only by hundreds of years of actual experience, but by numberless carefully conducted experiments in many countries and under widely varying conditions, that clovers and numerous other legumes supplied with tubercle (nodule) bacteria obtain from the air through the agency of these bacteria, under favorable conditions, all the nitrogen they require, and that they leave in the soil considerable quantities for succeeding crops. In Germany the amount of nitrogen added to the soil by legumes, besides that taken off in the crop, is estimated at 200 pounds per acre. In the United States the average for sixteen states is 122 pounds, equivalent to not less than 800 to 1,000 pounds of nitrate of soda per acre."—Year Book of Department of Agriculture for 1906.

"The subject of nitrogen fixation from the atmosphere is one of the most important problems lying at the foundation of agriculture."—Bulletin No. 71, Bureau of Plant Industry.

"Pure-culture inoculation must eventually replace the soil transfer methods for all kinds of soil inoculation . . . The pure culture method has come to stay."—Year Book of Department of Agriculture for 1906.

Now, Farmogerm is a pure culture. And it does do the work. It produces results such as other cultures have failed to produce for these reasons:

First—Our laboratory methods enable us to be sure of getting an absolutely pure culture of the right bacteria.

Second—The bacteria are bred up by successive inoculations of plants grown in nitrogen-free medium, and their nodule forming and nitrogen-fixing power thereby greatly increased.

Third—Each bottle of Farmogerm is individually inoculated and developed. The growth of the bacteria on the jelly-like medium can be seen and any contaminations or impurities detected, and each bottle is carefully inspected before it is shipped.

Fourth—Farmogerm is sent out in bottles, sealed with a special stopper which, while supplying the bacteria with all the air they need, absolutely prevents contamination. And it will last in good condition for months.

Fifth (and a feature of great importance)—Farmogerm needs no "development" or "treatment" before it is ready for use. We leave no delicate or difficult work to be done by the user.

Relative growth of red clover seed inoculated with Farmogerm and uninoculated seed.

Read these Letters

I have tried Farmogerm on beans with most gratifying results, the inoculated beans making a much more vigorous growth, maturing earlier and producing a larger crop than those not inoculated. E. W. Underhill, Syosset, L. I.

I made various practical tests with Farmogerm on my farm with clover, beans, peas and alfalfa with most satisfactory results. J. N. Hoff, New York City, Industrial & Agricultural Chemist.

I used Farmogerm on Alfalfa. . . . The stand is the finest I have ever seen in this country. J. W. Parmley, Ipswich, So. Dakota.

I planted Red Clover last year treated with Farmogerm. It was greatly benefited. This year I planted corn on the same land and on adjoining land. Corn on the land where inoculated clover was grown was better and matured earlier. Geo. T. Powell, Ghent, N. Y., Pres. Agricultural Expert Ass'n.

I sowed 1 acre of alfalfa inoculated with Farmogerm. It has come up evenly and I have a good stand. I have tried alfalfa before but never succeeded in getting such a good stand as I have at the present time. W. S. Downs, Derby, Conn.

Send for the pamphlet giving full particulars, showing how and why Farmogerm produces big crops and

MAKES POOR SOIL GOOD SOIL.

Be Sure to Use it on Your Cover or Soiling Crop this Year.

Here is another important point: You may sow an INOCULATED crop WITH your corn or oats, for instance, and BOTH CROPS will get the benefit at the same time.

PRICE, \$2.00 AN ACRE; GARDEN SIZE, 50 cents. 10 per cent discount on 25 acre orders. 15 per cent on 50 acre orders, and 20 per cent on 100 acre orders.

Farmogerm is prepared for the following legumes:

Red Clover,	Alsike,	Garden Beans,	Lentils,
Mammoth Clover	Alfalfa,	Soy Beans,	Sanfoin
Crimson Clover,	Berseem,	Vetch,	Peanuts,
Yellow Clover	Garden Peas,	Lupins,	Robinia
Burr Clover	Cow Peas,	Lathyrus Sylvestrus	Wistaria
White Clover	Canadian Field Peas	Perennial Pea	and other
Sweet Clover	Sweet Peas,	Fenugreek	Legumes,

Sold in Garden Size in a mixed culture good for Peas, Beans and Sweet Peas. Also for White Clover.

ORDER NOW, stating quantity wanted, for what crop, and when you intend to plant. Or if you want more information, write us and we'll be glad to send full particulars.
